

# Re-Imagine Success with Boundless Inspiration

Do you want to build a new narrative for what success looks like in your school?  
To take control of what matters to you, your school and your community?  
To ignite passions and realign your staff to what you all really care about?

**How do you respond to the needs of your learners?  
How do you measure success?**

**How do you know your school embodies your vision?  
How do your learners embody this?**

Our programme empowers schools to:

- define a clear and shared sense of purpose
- actively create a broader view of success
- gain clarity of direction
- bring to life the changes you want to see do that in a practical and manageable way

Our simple, tried and tested methodology will help you focus on:

- what matters most to you.
- engage you, your leaders and your wider stakeholders in a series of six practical sessions designed to bring your whole community with you.
- a supportive process and a range of practical take-aways.

By the end of the programme you will have re-imagined assessment to measure what really matters, when it matters.

Inspired by The Big Change Hopes4ED, our programme enables schools to deliver:

- #03: There is a broader view and story of success for every child
